

FUEL STORAGE – TRANSPORTABLE

TRANSCUBE CONTRACT

250 – 2,000 Litres

The TransCube Contract is a transportable, environmentally friendly double-walled fuel storage tank that offers an efficient solution for onsite fuelling and auxiliary fuel supply. This range features a lockable equipment cabinet, 4-way forklift pockets, and lifting/stacking corner brackets for ease of handling. The TransCube Contract range offers refuelling versatility in a simplified, economic unit. This unit is ideal for sites that don't require a lot of fuel, but still need efficiency and productivity.

FEATURES

LOCKABLE EQUIPMENT CABINET

Equipment & ports are secure and spills are contained. Secure hose access enables fueling while cabinet is locked.

LIFTABLE CORNER BRACKETS

Liftable by crane whilst full and easily stackable.

110% BUNDED

Built-in, weather proof secondary containment eliminates the need for drip trays.

FOUR WAY FORKLIFT POCKETS

Quick and easy maneuvering and mobility.

IDEAL USES & APPLICATIONS

DROP TESTED AS REQUIRED UNDER ADR

SHORT-TERM FUEL REQUIREMENT

Ideal for sites that require small amounts of fuel, TransCube Contract tanks offer refuelling versatility in a simplified, economic unit. This range is specifically designed for short-term projects, allowing quick and easy onsite refuelling.

STANDBY FUEL TANK

On sites that don't require constant tank movements, the TransCube Contract range can be used as a standby fuel tank - preventing machinery and equipment downtime. Refuel vehicles, machinery and any other equipment quickly and effortlessly.

FUEL TRANSPORT

TransCube Contract tanks can transport fuel safely and efficiently anywhere you need it. By transporting fuel to site with a TransCube, you are ready to start up on arrival due to its rapid deployment. TransCubes can be easily relocated between sites, reaching even the most difficult locations.

GENERATORS & AUXILIARY EQUIPMENT

TransCube Contract tanks can connect to one diesel powered piece of equipment and dispense fuel by pump at the same time. As an auxiliary fuel tank it provides longer engine running time, reducing number of site visits required for refuelling. Fuel can be dispensed by manual or electric pump, based on customer requirements.
